VOLUME	250 mL
PER UNIT.	6
PER PALLET	1290

## UPGRADE! MPM Ceramic Engine Protector

The MPM Ceramic Engine Protector features a new formulation making the product even more concentrated. As a result, the current 500 ml packaging will be changed to 250 ml. The concentrated fluid in the new 250 ml packaging, like the 500 ml variant, is suitable for 4 to 6 litres of engine oil.

### MPM Ceramic Engine Protector features

MPM Ceramic Engine Protector is a premium engine oil additive. It is versatile and specially designed to perform under the most extreme conditions. The high degree of adhesion creates an unmatched ceramic coating on the most critical and wear-sensitive parts of the engine such as: tappets, bearing shells and piston rings.

This MPM product provides a high-performance lubricating film that prevents metal on metal contact and ensures rapid heat transfer from the surface of internal components.

### In case of technical questions:

Please contact MPM Technical Support via [support@mpmoil.nl](mailto:support@mpmoil.nl) or call +31 (0)15 - 251 40 30.

### Key benefits at a glance:

- Significant reduction of friction and wear
- Restores engine power
- Decreases engine oil temperature
- Strengthens the lubricating oil film
- Improves cold start

### The result:

- Extends the engine's service life
- Reduces the engine's noise level
- Reduces harmful exhaust emissions
- Reduces fuel and oil consumption
- Provides long-term protection for your engine

### Application

MPM Ceramic Engine Protector is suitable for all gasoline, diesel and LPG engines, turbocharged or not. It is not harmful to catalytic converters and particulate filters. In addition, it can be mixed with all types of motor oils.

### Article numbers:

**New:** AD05250 - MPM Ceramic Engine Protector 250 ml.

### To be phased out:

AD05500 - MPM Ceramic Engine Protector 500 ml.
